MAP FinTech

A RegTech Platform
by Complyport

Simplifying Regulatory Reporting

Built for regulated financial firms operating across multiple jurisdictions, MAP FinTech simplifies the operational burden of global compliance. Developed by the **only** regulatory reporting provider continuously delivering EMIR reporting since go-live in 2014, the platform transforms fragmented trade and transaction data into regulator-ready submissions while delivering transparency, oversight and control across the full reporting lifecycle.

OUR SOLUTIONS

Transaction Reporting

- EMIR Reporting (EU & UK)
- MiFID II / MiFIR Reporting (EU & UK)
- SFTR Reporting (EU & UK)
- ASIC Reporting
- MAS Reporting
- CSA Reporting

Tax Reporting

- CRS Reporting
- FATCA Reporting

Trade Surveillance

- MarketAbuse Surveillance
- Best Execution Monitoring

WHY US

Award-Winning & Industry-Recognised:

Recognised for excellence in innovation, technology and client success across the financial services industry globally.

One -Stop Compliance Solutions:

End-to-end regulatory reporting and trade surveillance solutions tailored to meet evolving regulatory requirements.

Proven Track Record:

A platform that has successfully reported billions of transactions, with submissions accepted daily across multiple NCAs, TRs and ARMs.

Industry Pioneers:

The **only** regulatory reporting provider continuously delivering EMIR reporting since go-live in 2014.

Comprehensive Support:

Expert support during onboarding and switching with tailored health check reviews ensuring accuracy, efficiency and peace of mind.

Core Platform Capabilities

MAP FinTech is a cloud-based RegTech platform designed to manage the complete lifecycle of regulatory reporting and trade surveillance. Acting as a centralised regulatory operations hub, the platform extracts, transforms, validates, enriches, and submits trade and transaction data to regulators, Trade Repositories (TRs), and Approved Reporting Mechanisms (ARMs). It supports multiple global reporting regimes through a single interface, reducing operational complexity while improving accuracy, governance, and efficiency. The platform also integrates trade surveillance and Best Execution monitoring, allowing firms to monitor activity, detect anomalies, manage alerts, and strengthen compliance oversight within one system.

KEY FEATURES

Sourcing of information from various client systems

Routing and submitting

Enhanced validation of Data

Reconciliation of Data

Conversion, enhancing and re-formatting of the information/data

Exception Management and Error Correction

Validating, routing and submission to relevant authorities.

The Validation Service validates that the data directly sent to routing mechanisms without utilising our SystemLink service is consistent

Generate and export reports

About Complyport & MAP FinTech

Complyport is a leading provider of governance, risk, compliance and technology solutions to the financial services industry. MAP FinTech is Complyport's award-winning RegTech platform, designed to help firms meet complex regulatory obligations through a suite of integrated compliance and reporting solutions. The platform supports a wide range of international regulatory requirements, including EMIR, MiFID II/MiFIR, SFTR, FATCA, CRS, ASIC, MAS and CSA Reporting. In addition to regulatory reporting, MAP FinTech provides innovative and comprehensive solutions for Trade Surveillance (Market Abuse) and Best Execution Monitoring, helping firms streamline regulatory operations through a single technology platform.
